Standoff Attachment

The stand-offs must be attached at the recessed area on each end of the step.

• **Safety tip**

Periodically check mounting hardware and re-tighten (due to normal boat operation).

• **Keeping that bright finish!**

Local weather conditions may contribute to minor corrosion. Aluminum and stainless, like other metals, are not completely free from corrosion attack. Regular fresh water rinsing and periodic cleaning with a mild abrasive cleaner will help to retain lustre.

MAINTENANCE

• Never operate your boat with the ladder in position. Serious injury or damage to your boat or ladder may result.

• Check all steps and hardware before using

- Only one person on the ladder at a time
- Face ladder when entering boat or water
- This ladder designed for boat use only
- Do not use when motor is running
- No jumping or diving!

SAFETY INSTRUCTIONS

LADDERS BUILT WITH INTEGRITY!

Thank you for selecting our superior quality Garellick EEZ-In Brand Boarding Ladder. Your ladder was designed and manufactured using the finest material available to provide long product life. Choosing the proper size ladder for location and correct fit is important to assure safe, convenient, and reliable use.

ASSEMBLY INFORMATION

1. Attach stand-offs for the ladder on the lowest step possible so stand-off abuts the hull of the boat and the ladder hangs over the side in a perpendicular position.
2. If necessary, stand-offs can be shortened by cutting with a hack saw to desired length.
3. **Drill through pilot hole on bottom side of step using a 17/64" diameter drill bit.**

Use 1/4" bolts and nuts (provided). After stand-offs are attached, place poly tips on the ends. In some cases it may be easier to slip poly tips on after warming in hot water.

For Runabouts/Outboards/Inboards

**Comfortable
Contour Traction Molded
Stepping Surface**

1 6 " W I D E

**Telescoping Stainless Steel
Removable Swim and Ski Ladder**

The Original EEZ-In Boat Ladder

- **Designed to help make boarding easier** – Ideal when swimming, skiing and in emergencies
- **Strength** – Durable 1" diameter S.S. – Sturdy alloy promotes added safety. All aluminum standoffs. Capacity: 250 lbs.
- **Quality Components** – Premium vinyl-covered hooks and cushioned tips at all contact points resist mar-ring of boat hull. Wide contour traction molded poly steps are comfortable to the bare foot. Hooks and standoffs fold for compact storage.

- **Selection** – Two sizes available for proper extension into the water and ease of boarding.
- **Made in the U.S.A. for over 55 years!**

- Hooks on and hangs over the side of your boat
- Designed to hug the hull for safer boarding
- Hooks fold flat for stowage

Gunwale Side Hook Ladders – 1 1/2" Hooks

For wider decks – universal size hook

- 06131** 3 Steps, 36" H x 16" W
- 06141** 4 Steps, 48" H x 16" W
