

INSTRUCTIONS FOR COMBO ROOF RAKE ASSEMBLY

ASSEMBLY INFORMATION:

- Check parts against parts list.
- Read instructions completely before starting assembly.

SNOW RAKE ASSEMBLY INSTRUCTIONS:

STEP 1: Insert Snow Rake angled tube (A) between top edge and tab on blade (B). Align holes, secure with bolt (C) lock nut (D).

STEP 2: Align slot of roller (K) at blade (B) edge and push roller onto blade until roller rotates. Repeat other side.

NOTE: PLACING ROLLERS IN HOT WATER FOR 5 MINUTES WILL MAKE INSTALLATION EASIER.

STEP 3: Attach FLAT end of brace (E) to blade (B) by aligning holes and securing with bolt (F) and lock nut (D). Repeat for other side.

STEP 4: Attach CURVED end of braces (E) to angled tube (A) by aligning holes and secure in place with bolt (C) and lock nut (D).

STEP 5: Squeeze legs of snap button (J) together and insert into the swaged end of the extension tube (H). Repeat operation for other extension tubes.

STEP 6: Slip poly grip (G) on the end of one extension tube (H). NOTE: Grip will go on easier by heating in warm water.

STEP 7: To assemble rake for use, depress snap button (J) on pole, insert extension tube into angled tube end so snap button pops through hole. Repeat with extension tubes (H) until complete.

LEAF BRUSH ASSEMBLY INSTRUCTIONS:

STEP 1: Insert angled tube end (N) through brush (M). Align bolt holes, insert bolt (O) through bottom side of brush between bristles, and secure in place with lock nut (D).

STEP 2: Attach FLAT end of brace (E) to brush (M) by aligning holes and securing in place with a 1/4-20 x 1-1/2" bolt (C), 1/4" washer (L), and a 1/4-20 lock nut (D). Repeat for other side.

STEP 3: Attach CURVED end of braces (E) to angled tube (N) by aligning holes and secure in place with bolt (C) and lock nut (D).

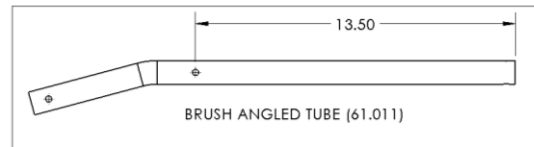

STEP 4: Depress snap button and remove Snow Rake (if attached). Then depress snap button and slide Brush Assembly onto poles.
